ELSEVIER Journal of Computational and Applied Mathematics 102 (1999) 335–336

JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index Volume 102 (1999)

Ali, J.M., R.M. Tookey, J.V. Ball and **A.A. Ball,** The generalised Cornu spiral and its application to span generation 37– 47
Anh, P.K., Comments on "The parallel version of the successive approximation method for quasilinear boundary-value problem" by Scheiber Ernö (*Letter to the Editor*) 333–334

Ball, A.A., see **Ali, J.M.** 37– 47
Ball, J.V., see **Ali, J.M.** 37– 47
Bi, Q. and **P. Yu,** Symbolic computation of normal forms for semi-simple cases 195–220

Cahlon, B., see **Hu, G.-D.** 221–234
Chen, H.-Y. and **H. Pottmann,** Approximation by ruled surfaces 143–156
Cheng, F., see **Zhang, C.** 21– 36

Dyn, N., see **Shenkman, P.** 157–180

Farouki, R.T., see **Ramamurthy, R.** 119–141
Farouki, R.T., see **Ramamurthy, R.** 253–277

Hu, G.-D. and **B. Cahlon,** Estimations on numerically stable step-size for neutral delay differential systems with multiple delays 221–234

Ishiwata, E., A practical choice of parameters in improved SOR-Newton method with orderings 315–331

Levin, D., see **Shenkman, P.** 157–180
López, J.L., Asymptotic expansions of integrals: The term-by-term integration method 181–194

Malyshev, A.N. and **M. Sadkane,** On the stability of large matrices 303–313
Meek, D.S. and **D.J. Walton,** Preface 1– 2
Muir, P.H., see **Voss, D.A.** 235–252

Paluszny, M., F. Tovar and **R.R. Patterson,** G^2 composite cubic Bézier curves 49– 71
Patterson, R.R., see **Paluszny, M.** 49– 71
Poliakoff, J.F., Y.K. Wong and **P.D. Thomas,** An automated curve fairing algorithm for cubic *B*-spline curves 73– 85
Pottmann, H., see **Chen, H.-Y.** 143–156

Ramamurthy, R. and **R.T. Farouki,** Voronoi diagram and medial axis algorithm for planar domains with curved boundaries I. Theoretical foundations 119–141
Ramamurthy, R. and **R.T. Farouki,** Voronoi diagram and medial axis algorithm for planar domains with curved boundaries — II: Detailed algorithm description 253–277
Rokne, J.G., see **Yao, C.** 3– 19
Rolle, J.-D., Minimum variance quadratic unbiased estimators as a tool to identify compound normal distributions 279–285

Sadkane, M., see **Malyshev, A.N.** 303–313
Seymour, C. and **K. Unsworth,** Interactive shape preserving interpolation by curvature continuous rational cubic splines 87–117
Shenkman, P., N. Dyn and **D. Levin,** Normals of the butterfly subdivision scheme surfaces and their applications 157–180

Thomas, P.D., see **Poliakoff, J.F.** 73– 85
Thukral, R., A family of Padé-type approximants for accelerating the convergence of sequences 287–302
Tookey, R.M., see **Ali, J.M.** 37– 47
Tovar, F., see **Paluszny, M.** 49– 71

Unsworth, K., see **Seymour, C.** 87–117

Voss, D.A. and **P.H. Muir,** Mono-implicit Runge–Kutta schemes for the parallel solution of initial value ODEs 235–252

Elsevier Science B.V.

Walton, D.J., see **Meek, D.S.** 1– 2
Wong, Y.K., see **Poliakoff, J.F.** 73– 85

Yao, C. and **J.G. Rokne**, An integral linear interpolation approach to the design of incremental line algorithms 3– 19
Yu, P., see **Bi, Q.** 195–220

Zhang, C. and **F. Cheng**, Constructing parametric quadratic curves 21– 36
